Curiosity is my characteristic trait, along with enthusiasm. As an archaeologist, I like to work with people with different expertises to keep on learning about our wonderful world. We are our past. Archaeology and history are paths that lead society to a better understanding of itself. This is why the link between science and society is so important. My chief interest is the study of Bronze and Iron Age communities in Italy. Over the years, I have grown into an expert of the archaeology of ancient Latium, the cradle of modern Rome. I'm fascinated by the socio-economic and political developments that led to the emergence of social inequality, a phenomenon that I approach critically.

ARCHEOLOGIST

Luca Alessandri

EDUCATION

Nov 2021-Oct 2025

Researcher - Principal Investigator

Rijksuniversiteit Groningen

Principal Investigator of the NWO four years granted project Salt and power. Early states, Rome and control of resources.

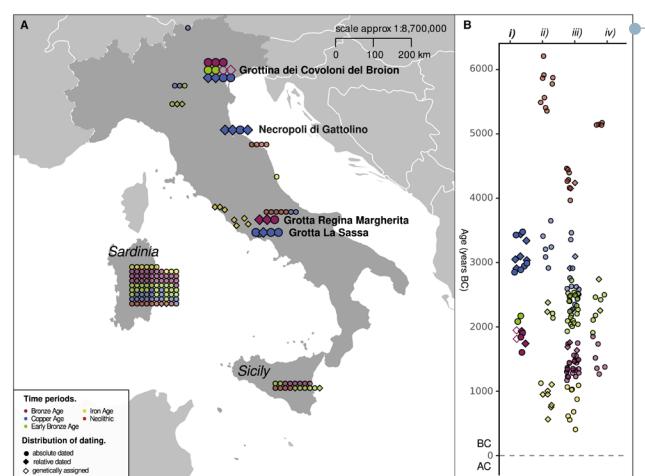

Feb 2019-Oct 2021

Associate Researcher

Rijksuniversiteit Groningen

At the moment I'm studying the Bronze Age and Iron Age salt-production and fish-processing in Italy. I am also investigating the Copper Age and Bronze Age burial site of La Sassa cave, using an integrated approach. The traditional anthropological and material culture evidence is flanked by stable and radiogenic isotopes analyses (N, C, Sr) and aDNA.

Feb 2020-Present

Subject Expert

Faculty of Mathematical, Physical and Natural Sciences of the University of Rome La Sapienza

July 2021- Dec 2022

Outside contractor

Soprintendenza Archeologia, Belle Arti e Paesaggio per le Province di Frosinone, Rieti e Latina

Assigned to the Latina province.

June 2021- Aug 2021

GIS Analyst

Dipartimento di Storia Culture Civiltà, University of Bologna

Geographical analysis of the data collected during the archaeological surveys around the Bronze Age site of Roca Vecchia (Apulia)

EXCAVATIONS

Digging has always been a passion, since I was seventeen. I started with a local Archaeological Association, at Nemi (in the Alban Hills) and along the Via Appia, and then with the university, in all Italy. I also spent some years in commercial archaeology, which gave me a great experience in organising and coordinating a lot of people.

SCUBA

I got my first license in 1990 and after a couple of years I started to teach scuba diving with the Ostia Diving Center (Rome) and then with the Argonauta Dive Club (Rome), as assistant instructor. I participated in an underwater archaeology course in collaboration with the STAS (Underwater Archaeology Technical Service of the Cultural Heritage Ministry). I'm also trained in teaching scuba diving to people with mobility or visual impairments.

1991 - Archaeology Scuba Diver

1990 - Open Water Diver

Nov. 2020

June 2015- Feb 2019

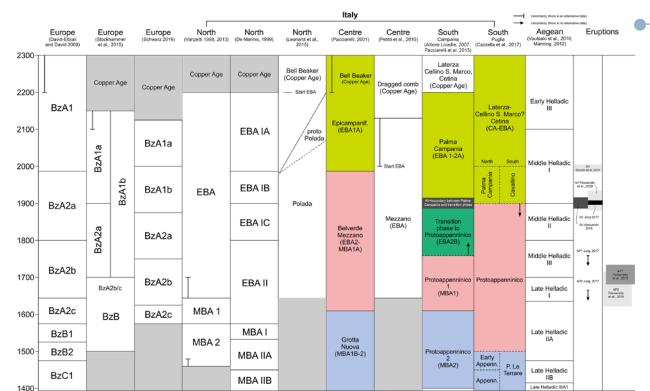

National Scientific Qualification for Associate Professor

Agenzia Nazionale di Valutazione del sistema Universitario e della Ricerca (ANVUR)
I got the National Scientific Qualification for Associate Professor in Archaeology.

Researcher

Rijksuniversiteit Groningen

In the framework of the NWO-funded project 'The Avellino Event: cultural and demographic effects of the great Bronze Age eruption of Mount Vesuvius'. I was responsible for the cultural studies and the isotopic mobility sub-project. I directed two excavations (La Sassa cave and Caprolace) aiming at new cultural and chronological evidence in the Bronze Age. I explored the implications and potential of the tephrochronology to synchronise the Italian Bronze Age with the Aegean and Central European chronological sequences. I proposed a new data for the Early Bronze Age Avellino eruption, using a Bayesian approach, and an updated chronological European scheme.

October 2009

Doctor of Philosophy

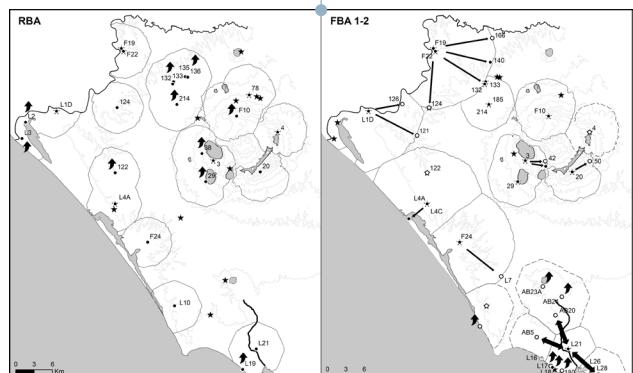

Rijksuniversiteit Groningen

Title: Latium Vetus in the Bronze Age and Early Iron Age.

Promotors: prof. dr. P.A.J. Attema; prof. R. Peroni

Evaluation committee: prof dr. M. Kleibrink; prof. dr. F. Vermeulen; prof. A. Guidi

I presented an in-depth analysis of the socio-economic dynamics that took place in Latium Vetus from the Bronze Age until the Early Iron Age. An up-to-date explanation of the emergence of the social inequality and the warrior elite was proposed, as well as a new subsistence and settlement model for the protohistory of South Latium

SPELEOLOGY

I started to explore caves in 1995, with the Grottaferrata Speleological Group, mainly in southern Latium. I'm a founding member and former president (2008-2012) of the Alban Hills Cave Group. I contribute to the publication of the Aurunci Mountains Cave Atlas. I served in the Latial Speleological Federation (FSL) being responsible for the Natural Cave Regional Cadastre (2014-2018) and I am the editor in chief of this association's journal from 2014. In 2013 I coordinated the organization of the VI Regional Congress of the FSL and edited the proceedings.

Master Degree

Università di Roma "La Sapienza"

Title: L'occupazione costiera protostorica del Lazio centromeridionale [Protohistory in central-southern coast of Latium]

Promotors: prof. R. Peroni, dr. A. Zarattini

I analysed the evolution of the coastal settlement and their relationships with the inner developing early states. I revisited all the already known sites checking and proposing up-to-date chronologies.
